## PROFILE 49 FLAT TO PITCH AND OVERROOFING FELT ROOFS

Britmet continues to find favour with the housing associations and local authorities for the refurbishment of non-traditional housing stock. The Britmet Tileform profile 49, was specified on this over roofing project of Non-traditional homes. Originally designed as a short-term solution to ease the burden of housing shortages, non-traditional homes have lasted way beyond their intended lifespans thanks to regular upgrades and maintenance. The Strong, durable and secure Britmet Tileform Profile 49 roofing was the perfect roof finish for this renovation project. The existing 5 -degree low pitch roofs, had had their day. Impact on the supporting frame and foundations using the

Britmet Tileform lightweight Flat to pitch system “Britframe” was only 16kg/m<sup>2</sup> so no extra structure had to be added. Britmet supplied the Britframe Popped rafter system which was erected on site in record time and this was cover with the Britmet Tileform profile 49 roof finish. Thermal levels of Insulation were also improved to achieve a value of 0.16 W/m<sup>2</sup>. The Britmet Tileform roofing system has been fitted to 36 properties. Given the tenant a fantastic styled new warm roof with massive savings off their heating bills.

Britmet Tileform Roofing, allows the contractors benefits as well, a Britmet Tileform Flat to pitch system and profile 46 tile panel system give the contractor great speed of installation, with only 2.05per m<sup>2</sup> and only 110 no tile panels per house. The refurbishment of these properties enhances the area and giving the tenants a more pleasant area to live in.
