Profile 49

One of Britmet Tileform largest specification projects last year was Berecroft estate. Britmet was successfully specified due to the British profiles, the profile 49 was chosen by the architects due it matching a Marley Ludlow traditional tile the architect originally requested. The architects were also looking to use the lightest tile system they could find due the existing building structure failing under the weight of the old concrete tiles. Britmet Tileforms profile 49 roofing solved this problem weighing only 7 kg/m² against the traditional tile equivalent of 50 kg/m² but still giving the specifier the roof finish they wanted.

The rustic terracotta colour was chosen from our beautiful colour range in an 0.45mm gauge.

Also the need to limit the number of roof outlets had to be met, Britmet Tileform had to design and manufacture a bespoke gutter system to cope with outlets being some 40m apart compared to the standard 15m apart. To match in with the rainwater goods, Britmet also designed and manufactured the new soffit facias to suit.

The Project

Berecroft estate was originally built in the late 70 / 80 s to cope with the London overflow requirements. **A system built method of construction was chosen for its speed and costs.**

The estate Comprises of 24 blocks of maisonettes and 86 bungalows requiring 18,000m² of profile 49 which is 37000 no profile 49 tiles and 8000 no flashing accessories. Everything delivered on 6 architect lorry loads, and when the client compared this with traditional materials, some 234,000 tiles would be required on 65no deliveries.

Not only was Britmet more environmental friendly in its manufacturing process but also in its delivery

The great speed of fixing the profile 49 helped the roofing contractors not only meet but reduced the roofing programme.

THE BENEFITS OF USING BRITMET TILEFORM LIGHTWEIGHT PROFILE 49 ROOFING SYSTEM FOR ALL YOUR NON – TRADITIONAL HOUSING.

FEATURES & BENEFITS

- Designed to give a traditional tile appearance
- Lightweight
- Minimum pitch 12°
- Good vandal resistance (0.9mm steel base)
- Easy to handle
- Offers reduced structure
- Quick installation
- Less labour intensive
- Cost effective
- Maintenance free
- Extensive range of accessories and flashings available
- Fully dry-fixed
- Guaranteed for 40-years against weather penetration
- Full technical support available
- British manufactured

Why not contact us today on 01295 250998 for free technical advice, quotations and how you can benefit from a Britmet Tileform Lightweight Profile 49 Roofing System.
