Britsky

The ultimate way forward for Britmet clients is to provide new housing onto existing housing stock. With no land to acquire, less planning consultancy, due to planning restrictions being uplifted, Britsky can provide our social and private housing. Providers get more out of their existing stock. The Britsky solution makes financial and commercial sense. Britsky offers 2 solutions, a factory assembled system, to an on-site assembled system. Both systems promote special erection, saving considerable installations time compared to conventional construction methods.

Britsky gives the client a great flexibility in design offering single and double story roof extensions, with varied styles to suit and match surrounding areas. Where possible the British design team will develop a roof top development onto the existing structure which creates a cost effective roof top solution. If required Britsky structural team can design a supporting skeleton frame around the existing building to support the new Britsky roof top units.

Britsky can design, manufacture and erect your roof top dwelling by using our professional team of structural engineers, architects and specialist list of installers. The Britsky team are proud that from the flat roof up all our products are British manufactured, so skys the limit when you use our Britsky system.

Britline offers a range of Rainwater goods and soffit fascia, which are powder coated to suit our clients requirements, offering specifiers, DIYs and installers the highest standard of performance, great visual appeal and long life.

Britmet Tileform total roofing solutions have been used a great variety of buildings from Universities, Schools, Pavilions, Ruby Clubs, Public buildings, Churches, Office blocks, Housing, Low rise and High rise blocks of Flats, to Retail, Commercial, Modular to Garages and Conservatories.

We are proud of being the only British manufacturer and supplier of these systems giving our clients their wall and roofing solutions all fixed with our warranty and approved list of installers.
