## PANTILE 2000 FLAT TO PITCH ROOF CONVERSION BRITFRAME

Britmet Tileform's Flat to Pitch Roof systems "Britframe" is a lightweight structural metal frame system to convert flat roofs to pitched. Britframe offers a permanent solution to failed flat roofs and can accommodate a variety of roof designs, offering a comprehensive range of roof finishes. Britframe can be used over all existing flat roof construction methods, using our propped rafter system, full spanning truss system or a combination of both, the Britframe post and rail system.

Britframe is a cost effective lightweight structural solution to create a pitched roof option that enhances the overall aesthetic of tired troublesome flat roofs. Used on schools, blocks of flats, community buildings and care homes to name a few, all supplied and manufactured in **Britain**.

Keeping the pound in Britain, making our economy stronger.
