PANTILE 2000 FLAT TO PITCH ROOF CONVERSION

Britmet Tileform's Flat to Pitch Roof systems "Britframe" A lightweight structural metal frame system to convert flat roofs to pitched. Britframe offers a permanent solution to failed flat roofs, and can accommodate a variety of roof designs, offering a comprehensive range of roof finishes. Britframe can be used over all existing flat roof construction methods, using our propped rafter system or the full spanning truss system, or a combination of both, The Britframe post and rail system.

Britframe is a cost effective lightweight structural solution to create a pitched roof option that enhances the overall aesthetic of tired troublesome flat roofs. Used on schools, Blocks of flats, Community buildings and care homes to name a few, all manufactured and supplied in Britain.
