PANTILE 2000 OVERROOING LOW PITCH FELT ROOFS

Britmet continues to find favour with the MOD for the refurbishment of non-traditional housing stock, the latest to specify Britmet Tileform on this over roofing project. Non-traditional homes Originally designed as a short-term solution to ease the burden of housing shortages, non-traditional homes have lasted way beyond their intended lifespans thanks to regular upgrades and maintenance.

The Strong, durable and secure Britmet Tileform pantile 2000 eave to ridge tile sheet was the perfect roof finish for this renovation project. The 5-degree low pitch roofs, which had their day only had one solution, which was to use the eave to ridge pantile 2000 tile sheets. The impact on the supporting frame and foundations using the Britmet Tileform system was only 11kg/m² so no extra structure had to be added. Thermal levels of Insulation were also improved to achieve a value of 0.16 W/m² the Britmet Tileform roofing system has been fitted to 70 properties. Given the tenant a fantastic styled new warm roof with massive savings off their heating bills.

Britmet Tileform, gives the contractors benefits as well, the eave to ridge tile sheets give the contractor great speed of installation, with only 10 tile sheets per house. The refurbishment of these properties enhances the area and giving the tenants a more pleasant area to live in.
